

Latest measures in response to the Novel Coronavirus situation

In view of the latest public health situation caused by Novel Coronavirus as revealed by the Hong Kong SAR Government today, Christian Action is now adopting the following precautionary measures in our offices and centres:

- To clean and disinfect the lift, entrance, enquiry counters and all facilities in the common areas etc. at Headquarters on a regular basis. All the workplace inside the training and service centres will also be cleaned according to the guidance from Centre for Health Protection.
- All visitors including trainees, courses applicants, service users etc. have to take body temperature measurement and wear a mask.
- If visitors have symptoms of upper respiratory tract infection, e.g. coughing, sneezing etc., we will advise them to see the doctor as soon as possible.
- Please appreciate we have a limited quantity of masks in hands and the first priority will be given to our staff. Those visitors who do not wear a mask and have fever will not be allowed to access to our premises in order to mitigate public health risk for the protection of our employees and other visitors.

The above arrangements will be reviewed according to the latest situation.

Thank you for your understanding in advance.
